## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The instant claim is drawn to a compound (monomer); however, applicants attempt to define the compound not with a definite structure, but with functional language. As such it is unclear what compound, i.e., what definite structure, applicants are actually claiming. The terms applicants use to define the compound, i.e., dienophile groups, rings structure with two conjugated carbon-carbons double bonds, etc., can apply to a great many compounds, which further lends to the lack of clarity or specificity regarding the compound applicants are actually claiming.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 6, and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by Tobe et al (J. Org. Chem. 1997).

Art Unit: 1621

Compounds 8a-d', which when produced exist in a solvent, anticipate the instant claims.

Claims 1, 6, and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by Tovar et al (J. Org. Chem. 1997).

Compounds 7a,b, which when produced exist in a solvent, anticipate the instant claims.

Claims 1, 2, and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by Godschalx et al (US 5,965,679).

Compounds A, E, and F (col. 37- col. 40) anticipate the instant claims.

Claims 3-5, 8 and 9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim 3 is missing appropriate punctuation. Proper correction is required.
